

MARKETING

WHAT IS MARKETING?

Marketing is about being an advocate for the customer and providing the customer's voice to the rest of the company. It is both a science and an art - great marketing is systematic and analytic (like analyzing marketing research or describing and selecting customer segments) but is also creative (like creating a compelling ad or writing great content for social media). Marketers develop, promote, and price products and decide where to sell those products to create long-term relationships with customers.
